📁 PROFESSIONAL EXPERIENCE

Idlewild Digital | Software Engineer (On-site)

Mar 2026 – Present

- **Infrastructure:** Dockerized and redeployed production Django services across AWS, GCP, and VPS; resolved container startup ordering issues at the infrastructure level.
- **Payments:** Refactored Stripe on SmallsLive (3 NYC jazz venues) for 3DS support — payment method → confirmation → payment intent via API → 3DS challenge → capture.
- **LLM Platform (AYO):** Migrated chat storage from LiteLLM to LibreChat, integrated Keycloak SSO with JWT refresh-retry, and shipped streaming CSV export via Python generators with N+1-free prefetching.

Idlewild Digital | Backend Developer (Remote)

Jan 2024 – Feb 2026

- **Architecture:** Owned ~75% of LMS backend (Django REST Framework) — fine-grained RBAC, secure data handling, and automated PDF certificate generation via WeasyPrint.
- **Performance:** Eliminated N+1 bottlenecks in PostgreSQL via `select_related/prefetch_related`; built Crabarian, a Python ETL pipeline automating data ingestion end-to-end.
- **Full-Stack:** Integrated Vue.js with Django for American Provost Connect; enforced architectural consistency through unit tests and code reviews.

Idlewild Digital | Python Intern

Aug 2023 – Dec 2023

- Owned end-to-end SDLC of “Daily Updates” internal reporting system on Linux/Unix; promoted to Backend Developer in 5 months.

✂ TECHNICAL SKILLS

Languages: Python (Advanced), JavaScript (ES6+), Java, C++, C, SQL.

Full Stack & Web: Django, Django REST Framework, Vue.js, HTML5, CSS3, REST APIs.

Infrastructure & Tools: Docker, AWS, GCP, VPS, Linux/Unix, Git, CI/CD, PostgreSQL, Stripe, Keycloak.

Core Competencies: Data Structures & Algorithms, System Design, Performance Optimization.

📁 PROJECTS & PUBLICATIONS

University Certificate Automation System | Full Stack Lead

- Designed and pitched a full-stack certificate platform to Khulna University ICT Cell covering architecture, security, and deployment.
- **Links:** Backend | Frontend | Demo | Presentation

Vision Transformer-Based Classification of Bearing Faults from Vibration Signal Spectrograms | First Author

- Published in *IEEE ICCIT 2025*, Cox’s Bazar, Dec 2025; ViT-based fault diagnosis via STFT spectrograms achieving 99.28% accuracy on the Paderborn University dataset. DOI: 10.1109/ICCIT68739.2025.11490241

🎓 EDUCATION

Khulna University

Graduated: January 2026

B.Sc. Engg. in Electronics and Communication Engineering

- **Relevant Coursework:** Data Structures & Algorithms, Database Systems, Computer Networks, OOP.
- **Industrial Attachment:** Data Science & Engineering Trainee at Grameenphone; built a RAG chatbot API using vector embeddings for customer support automation (Jan–Feb 2025).
